There are a number of supports and services provided by government and the community sector for people with disability across Australia.

The NDIA may identify that your supports are best delivered by these other service systems.

This page provides a list of organisations who can help with support, both nationally and in different states and territories.

The Agency's Local Area Coordinators (LACs) and Early Childhood Early Intervention Partners (ECEIs) may also help with linking you to these services.

You can find [LAC and ECEI partners in your area](#). Some other resources are listed below.

The Agency's [Information, Linkages and Capacity Building \(ILC\) program](#) is designed to support people with disability to live more independently and get involved in communities and workplaces. It gives grant funding that communities can use to become more accessible and inclusive. ILC provides you, your family and carers with relevant information, and gives grants to organisations to deliver activities and supports that you can get involved in.
