

Victorian Child Safe Standards Workshop

Designed by practitioners for practitioners

The Victorian Child Safe Standards require organisations involving children to have policies, procedures, and practices to keep them safe. Organisations that provide services or facilities for children must implement Child Safe Standards to protect them from abuse.

The Child Safe Standards workshop features a presentation on the Victorian Child Safe Standards and gives participants an understanding of what is required to implement each standard. This highly interactive workshop is a great way for participants to reflect on what their organisation is doing well and identify areas that need to be addressed. Participants will have the opportunity to ask questions and explore issues that are relevant to their organisation. The workshop can be delivered either online or on premise.

Learning Outcomes:

- What is required to implement the 11 Child Safe Standards including an overview of the obligations and responsibilities.
- How to focus on the safety and wellbeing of First Nations children.
- How to build safety and wellbeing for diverse children and families.
- Reflect on what an organisation is doing well and identify areas that require attention to meet the standards.
- Where to access specialised resources for implementing the standards,

Duration: Typically 3 hours subject to customisation requirements.
