Victorian Child Safe Standards eLearning module (LMS SCORM purchase)

Designed by practitioners for practitioners

The Victorian Child Safe Standards require organisations involving children to have policies, procedures, and practices to keep them safe. Organisations that provide services or facilities for children must implement Child Safe Standards to protect them from abuse.

Child Safe Standards eLearn Module (~1 hour)

This interactive eLearn module created by The Centre is a great alternative to or pre-requisite for a Child Safe Standards Workshop. The eLearn module informs participants of each of the 11 Standards currently in place and helps individuals understand what measures they can take to help their organisation be compliant with the standards.

Key features:

- Understand all 11 Child Safe Standards and the role of the Commission for Children and Young People (CCYP).
- Checklists to help individuals and organisations implement each standard.
- Interactive activities and videos.
- Further reading and key resources.
- Quizzes to test your knowledge.

The eLearn can be hosted on your organisation's LMS via a SCORM download. To find out more about this option, please contact training@cfecfw.asn.au.
